

IADR

International Association
for Dental Research

Connecting researchers across the globe

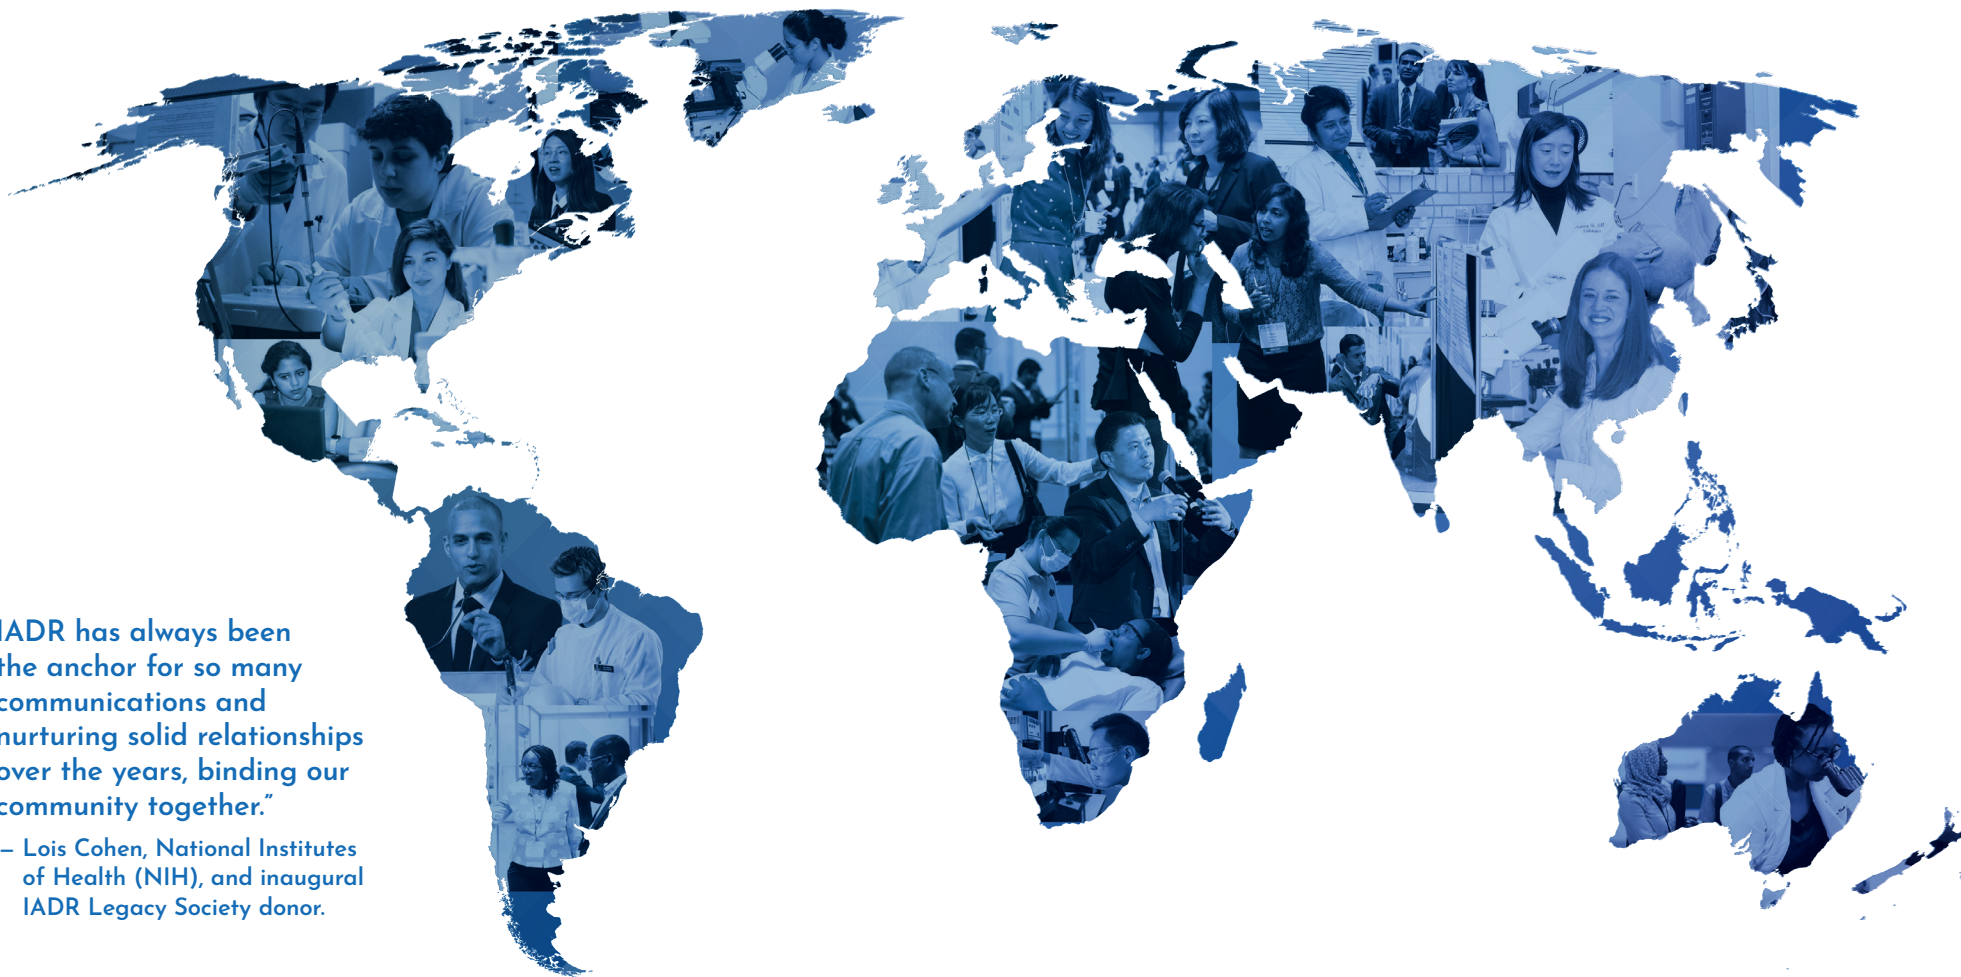

MOVE RESEARCH INTO ACTION

With your investment, IADR will match or exceed the strides of the last Century and continue to support and cultivate the diverse scientific workforce of the future.

IADR is the premier international membership association for dental, oral, and craniofacial research for health and well-being worldwide. With your support, we have connected people across the globe and across multiple disciplines, encouraged young researchers, and created opportunities for scientific exchange, resulting in advancing oral health research and its applications on a global scale.

"IADR has always been the anchor for so many communications and nurturing solid relationships over the years, binding our community together."

– Lois Cohen, National Institutes of Health (NIH), and inaugural IADR Legacy Society donor.

YOUR INVESTMENT IN IADR

Your charitable support enables IADR to provide the funding and resources to successfully promote and implement initiatives designed to strengthen and connect a diverse global research workforce including, but not limited to:

- **Travel and research support** for scientific researchers in low and middle-income countries through grants and awards.
- **Outreach to countries without capacity** by fostering young investigators' research through fellowships and membership funding.
- **Assistance for researchers in Low and Middle-income Countries** through the IADR Adopt-A-Member program. This program financially supports members in areas of the world who may not be financially able to pay IADR dues or to attend the IADR General Session.
- **Regional Development Grants** promote oral health research worldwide with specific emphasis on assisting and educating regions with less developed research programs.
- **Online educational resources** offer accessible continuing education credit and the latest insights into dental, oral, and craniofacial research.
- **Access to the leading scientific meeting** for dental, oral, and craniofacial research, the IADR General Session & Exhibition.

"IADR is very effective in other parts of the world. The organization connects researchers and fosters collaboration. IADR is important for countries that don't have the infrastructure."

– Marcelo W. B. Araujo, DDS, MS, Ph.D, member since 1999, Chief Science Officer, American Dental Association (ADA) and CEO, ADA Science & Research Institute

"IADR is the premier dental research group in the world. It is so much better than a specialty group or association for research networking. They connect people across the globe and encourage younger researchers. As a forum for young people, IADR is very powerful."

– Finbarr Allen, Dean, National University of Singapore Faculty of Dentistry

DISCOVER, NETWORK, ADVANCE!

IADR VISION Statement

Oral health for the world through discovery and dissemination.

IADR MISSION Statement

Drive dental, oral, and craniofacial research for health and well-being worldwide.

IADR Core Values

Scientific Excellence: IADR values science conducted at the highest possible levels of rigor, innovation and ethics, across disciplines, from discovery science to clinical implementation to global population health.

Social Responsibility: IADR values the pursuit of science to improve health and well-being for all people, to reduce health inequalities and inequities, and proactively takes actions and positions to improve health.

Scientific Community: IADR values a diverse and inclusive scientific workforce, promotes work-life balance, and supports educational activities and mentoring networks to develop the next generation of scientists.
