IADR Announces 2022 IADR Hatton Award Winners

Alexandria, VA, USA, June 22, 2022 – The International Association for Dental Research (IADR) is pleased to announce the winners of the 2022 IADR Hatton Competition. The winners were recognized during the Opening Ceremonies of the virtual 100th General Session & Exhibition of the IADR, held in conjunction with the 5th Meeting of the Asia Pacific Region on June 20-25, 2022.

The competition is designed to provide an opportunity for the best junior investigators from all IADR Divisions and Sections to present their research at the annual IADR General Session. A major goal of the IADR Hatton Competition and Awards is to give as many students and new investigators as possible access to the IADR General Session, as well as the experience to present in both the competition and for the General Session.

The Hatton Award was established in 1953 in honor of IADR's 10th President Edward H. Hatton and is IADR's longest running awards that recognize new investigators. This year, 54 individuals from 24 IADR Divisions and four Sections were selected to compete in the IADR Hatton Competition, which was held on Tuesday, June 21, 2022.

The winners are:
