Call for Papers: JDR Special Issue on Advanced Imaging in DOC Research

The *Journal of Dental Research* is excited to announce the publication of a special issue in 2024 highlighting innovations and applications of advanced imaging techniques for the benefit of dental, oral, and craniofacial (DOC) health. The guest editors are Dana Graves, Professor of Periodontics and Vice Dean, University of Pennsylvania School of Dental Medicine, and Sergio Uribe, Associate Professor and Lead Researcher, Department of Conservative Dentistry and Oral Health, Riga Stradins University, Latvia. **The deadline to submit an article is February 28, 2024.**

Cannabidiol as an Alternative Analgesic for Acute Dental Pain

A recent study published in the *Journal of Dental Research (JDR)* assesses the effectiveness and safety of Cannabidiol (CBD) as an analgesic for patients with emergency acute dental pain. The study, “Cannabidiol as an Alternative Analgesic for Acute Dental Pain,” by Vanessa Chrepa, et al., randomized sixty-one patients into three groups: CBD10 (CBD 10mg/kg), CBD20 (CBD 20mg/kg), and Placebo. A single dose of respective oral solution was administered, and subjects were monitored for three hours.

The primary outcome measure was the numerical pain differences using a Visual Analogue Scale (VAS) from baseline within and among the groups. Secondary outcome measures included ordinal pain intensity differences, the onset of significant pain relief, maximum pain relief, changes in bite force within and among the groups, psychoactive effects, mood changes, and other adverse events.

New Issue of *Advances in Dental Research* Offers a Comprehensive Analysis of Aging and Oral Health Research

The *Journal of Dental Research (JDR)* is excited to announce the publication of a new issue of *Advances in Dental Research*, a supplement to the *JDR*, entitled, [“Geroscience: Aging and Oral Health Research.”](#)

The 2023 Annual Meeting of the American Association for Dental, Oral, and Craniofacial Research and the Canadian Association for Dental Research featured a three-day “Meeting Within a Meeting” on the topic of “Geroscience: Aging and Oral Health Research,” organized by AADOCR past president Jane Weintraub. These sessions are summarized in the upcoming issue of *Advances in Dental Research*.

[Advances in Dental Research](#) is an online supplement to the *JDR*. A subscription to *JDR* grants you access to the articles in *Advances in Dental Research*. This journal is a member of the Committee on Publication Ethics.

NEWS & ANNOUNCEMENTS

Fifth Conference of the Parties on the Minamata Convention: IADR Intervenes

L to R: IADR Member and past IADR Board member Gottfried Schmalz, IADR Director of Science Policy Makyba Charles-Ayinde, and FDI Advocacy & Policy Manager Tolulope Osigbesan.

During the fifth Conference of the Parties on the Minamata Convention (COP5), Parties considered three proposals to amend Annex A: Part I and II. Botswana and Burkina Faso submitted an amendment proposing alternate text on behalf of the African region (AR). The AR proposal called for the phase out of dental amalgam by 2030 (Annex A, part I) and for the addition of two mandatory requirements (Annex A Part II):

| Mercury Added Products | Provisions |
|------------------------|---|
| Dental amalgam | In addition, Parties shall: Submit to the Secretariat a national plan concerning the measures it intends to implement to phase out the use of dental amalgam |

| | |
|--|---|
| | Exclude or not allow, by taking measures as appropriate, the use of dental amalgam in government insurance policies and programs. |
|--|---|

IADR, in collaboration with the FDI, intervened with a [statement](#) that provided support for the current phase down approach of the Minamata Convention without the need for further amendments to Annex A. Further, as outlined in the Global Oral Health Action Plan, we urged all Parties to maintain the current phase-down model which respects differences in country capacities and guarantees access to oral health and the overall well-being of populations.

After several days of negotiations, the Member States were unable to come to consensus on adding dental amalgam to Annex A Part I with a phase out date nor the second addition to Annex A Part II. Therefore, those proposals will be moved forward to COP6 for deliberation (to be held in 2025). However, they did pass a compromise that added a new measure to Annex A: Part II that provides for the submission of a national action plan.

| Mercury Added Products | Provisions |
|------------------------|--|
| Dental amalgam | In addition, Parties that have not yet phased out dental amalgam shall: Submit to the secretariat a national action plan or a report based on available information with respect to the progress they have made or are making to phase down or phase out dental amalgam every four years as part of national reporting. |

Request for Comments: Policy Statement on Tobacco Funded Research

Boards have jointly requested the creation of a task force to draft a policy statement that will govern how the Association deals with abstracts and manuscripts funded by tobacco companies. This policy will apply to both meetings and publication journals (JDR and JDR CTR). At this time, IADR and AADOCR has a policy and position statement for [sugar sweetened beverages](#) regarding investments and [healthy meetings](#) and this policy statement will serve as an extension of those policies.

We would like to invite the wider IADR membership to submit comments on this policy statement. Please submit all comments to mcayinde@iadr.org.

All comments received will be provided to the SIC Task Force for their consideration and response. The deadline for submission of comments is **December 8th 2023 at 5:00pm EST**.

[Read the draft statement](#)

Awards Deadline Approaching – December 1, 2023!

[IADR STAR Network Academy Fellowship](#)

Funded by IADR, the purpose of this fellowship is to support the awardee's attendance to the IADR General Session & Exhibition, and then to have a research experience in a renowned research laboratory immediately before or after the IADR General Session. See the website for participating laboratories in New Orleans, Louisiana, USA

- \$5,000 for travel and accommodations
- Prepaid meeting registration

[IADR Innovation in Oral Care Awards](#)

The Innovation in Oral Care Awards are jointly sponsored by IADR and Haleon, with funding provided exclusively by Haleon. The innovation awards offer opportunities for investigators to conduct oral health research that will have a direct impact on the oral health of the public.

- Three awards of up to \$50,000.

[IADR Osteology Foundation New Investigator Award in Oral Tissue Regeneration](#)

The IADR Osteology Foundation New Investigator Award in Oral Tissue Regeneration is jointly sponsored by the IADR and the Osteology Foundation, with funding provided exclusively by the Osteology Foundation. Funding research into all aspects of oral tissue regeneration is a core task of the Osteology Foundation.

- One award of up to \$75,000

Access Cutting-Edge Research from the 2023 IADR/LAR General Session

Access Cutting-Edge Research from the 2023 IADR/LAR General Session Missed a session in Bogotá? Not to worry! Select scientific content from the 2023 IADR/LAR General Session was recorded for complimentary access by IADR members in the [IADR Webinar & CE On Demand Library](#).

Participants can view 78.25 hours of content worth 72.25 hours of Continuing Education credit until **June 25, 2026**.

Access to this member benefit will continue with your membership renewal for 2024.

[Renew today](#) to continue access through the new year!

The image shows a banner for the IADR General Session with the text "IADR GENERAL SESSION" and "2023". Below the banner is a photograph of a man in a suit speaking at a podium. To the right of the photo, there is text: "Now Available to All Current Members!", "78.25 Hours of Recorded content", "72.25 Hours of CE Credit", and "Available to IADR Members through June 25, 2026". At the bottom right, there is a button that says "Visit the Webinar & CE On Demand Library".

Nakao Foundation Now Accepting Research Grant Applications

Dental academics and clinicians are invited to apply for Nakao Foundation Grants until **December 3, 2023**. The organization supports clinical trials and research on important topics such as minimum intervention dentistry and oral health of the elderly.

Successful applications will receive fully-funded projects of CHF 50,000 per year in addition to wide exposure among dental professionals, the dental industry, and the general public.

The maximum project duration is two years and up to CHF 100,000. If the project budget is over CHF 50,000 over two years, applicants will need to submit applications for the second year as well.

FDI General Assembly Adopts New Position on Free Sugars

FDI General Assembly Adopts New Position on Free Sugars The FDI General Assembly took a significant step to address excessive sugar consumption by adopting the first-ever [FDI Position on Free Sugars](#) at the 2023 World Dental Congress (WDC) in Sydney, Australia. The new position builds on past efforts to address free sugars, including [FDI's Vision 2030](#), an action plan launched in 2021 to "reduce dietary sugar intake and address sugar as a commercial determinant of health." Excessive

consumption of sugars is a leading risk factor for dental caries and has caused worldwide increases in oral disease, cardiovascular disease, cancer, obesity, and diabetes.

Sage Publications Webinar Series: How to Do Research and Get Published

Sage Publications Webinar Series: How to Do Research and Get Published In this new monthly webinar series, Sage and external speakers from various disciplines aim to answer all your questions about the research and publishing process.

This series will address the stumbling blocks every researcher encounters in the beginning of their careers and provides practical and in-depth guidance to help you get published.

All webinars take place at 8am PT / 11am ET / 5pm CET
